Tahir Anwarhusen Attar

8956704240 | tahirattar087@gmail.com | www.linkedin.com/in/tahir-attar

SUMMARY

Final-year Computer Science Engineering student specializing in **Artificial Intelligence and Machine Learning** with strong **full-stack development** experience. Proficient in **Python**, data-driven model development, and modern web technologies, with hands-on experience delivering end-to-end projects. Seeking to contribute to fast-paced engineering teams with immediate impact.

EDUCATION

Annasaheb Dange College of Engineering & Technology (ADCET) — **Ashta, Maharashtra**
B. Tech in Computer Science & Engineering; CGPA: 7.76 — *2022 – Present*

Chhatrapati Shahu Vidyalaya & Junior College — **Kolhapur, Maharashtra**
HSC (Class 12) – Science (PCM); 73.33% — *2021 – 2022*

Mahatma Gandhi Vidyalaya — **Kadegaon, Maharashtra**
SSC (Class 10); 95.80% — *2019 – 2020*

TECHNICAL SKILLS

Generative AI & Agents: LangChain, LangGraph, LLM Integration, Agentic Workflows
Languages: Python, C/C++, Java, JavaScript, TypeScript
Web Development: React.js, HTML5, CSS3, Node.js (Basic)
Databases: MySQL, Firebase
Tools & Platforms: Git, GitHub, VS Code, Google Colab, Jupyter Notebook, Linux (Ubuntu)

PROJECTS

E-Commerce Website for Agriculture Products | *React, Firebase*

- Developed a responsive web application to manage and showcase agricultural products, improving accessibility for farmers and buyers
- Engineered an admin dashboard for real-time order management and product inventory control.
- Implemented secure user authentication and a dynamic product showcase interface using React state management.

Multistage Malware Detection System | *Python*

- **Developed a** Windows-based multistage malware detection system **leveraging** Machine Learning**,** static analysis**,** dynamic sandboxing**, and** behavioral monitoring **for real-time threat identification.**
- **Engineered a** scalable modular architecture **with background agent, backend orchestration,** GUI dashboard**, and** Telegram Bot integration **for automated alerts and remote file management.**
- **Implemented** continuous file and process monitoring**,** instant threat notifications**, Windows service support, and** comprehensive security reporting**, demonstrating applied** AI/ML cybersecurity engineering**.**

Sentimental Analysis for Airline Reviews | *Streamlit, Python, BERT*

- Built an **end-to-end NLP pipeline** for airline review analysis using **BERT-based Aspect-Based Sentiment Analysis (ABSA)** to extract service-level insights (food, crew, comfort, entertainment, baggage).
- Fine-tuned **Transformer (BERT) models** for supervised sentiment classification, achieving **~91% accuracy**, and benchmarked performance against classical ML and LSTM models.
- Developed a **real-time analytics dashboard** with **Streamlit and Plotly**, featuring aspect-wise radial gauges and trend indicators for continuous airline service monitoring.

EXPERIENCE

Palo Alto Networks Cybersecurity Virtual Internship — July 2024 – Sep 2024

- Completed a hands-on cybersecurity internship focusing on network security, threat detection, and incident response.
- Gained experience in firewall configuration, intrusion detection, and security best practices.

CERTIFICATIONS

E-Business, *NPTEL, IIT Kharagpur* — July 2024 – Oct 2024
Frontend Web Development, *Udemy*, *Mehmood Khalil* — May 2025 – July 2025
Python Complete Course For Beginners, Udemy, Horizon — June 2025 – July 2025
